

Stamus Networks Appliances

Stamus ND and Stamus NDR each consist of two software components: Clear NDR Probes and Clear NDR™. Each play a critical role in scaling the system.

While Clear NDR and Clear NDR Probe software may be deployed in a private cloud, a public cloud, on your own dedicated hardware, or in hybrid environments, many organizations do not have the resources to install and maintain the software in these scenarios.

For those organizations looking for a turn-key deployment experience, Stamus Networks offers a family of integrated network appliances which are optimized for and pre-loaded with the Clear NDR Probe or Clear NDR software.

ABOUT STAMUS NETWORKS

Stamus Networks believes that cyber defense is bigger than any single person, platform, company, or technology. That's why we leverage the power of community to deliver the next generation of open and transparent network defense. Trusted by security teams at the world's most targeted organizations, our flagship offering – Clear NDR™ – empowers cyber defenders to uncover and stop serious threats and unauthorized network activity before they harm their organizations. Clear NDR helps defenders see more clearly and act more confidently through detection they can trust with results they can explain.
