See Clearly.
Act Confidently.

Uncover hidden threats and unauthorized activity hiding in your network with Clear NDR™

Clear NDR™ is an open and transparent network threat detection and response (NDR) system that empowers defenders with AI-powered automation and deep network insights to build a more efficient and secure SOC.

Clear NDR is an Open and transparent Network Detection and Response that delivers:

Clear Visibility - Monitor activities across your entire attack surface

Clear Detection - Multi-layer, transparent detections you can understand

**Clear Evidence** - Everything you need to quickly resolve the incident

**Clear Response** - The confidence you need to automate your response

A Force Multiplier for the AI-Powered Autonomous SOC

Clear NDR drives automation directly

Clear NDR provides the industry's richest source of network telemetry to combine with endpoint and other data at your AI-powered SIEM for a complete picture of your enterprise activity and advanced AI-enabled threat detection and response

Clear NDR™ is an open and transparent network threat detection and response (NDR) system that empowers defenders with AI-powered automation and deep network insights to build a more efficient and secure SOC.
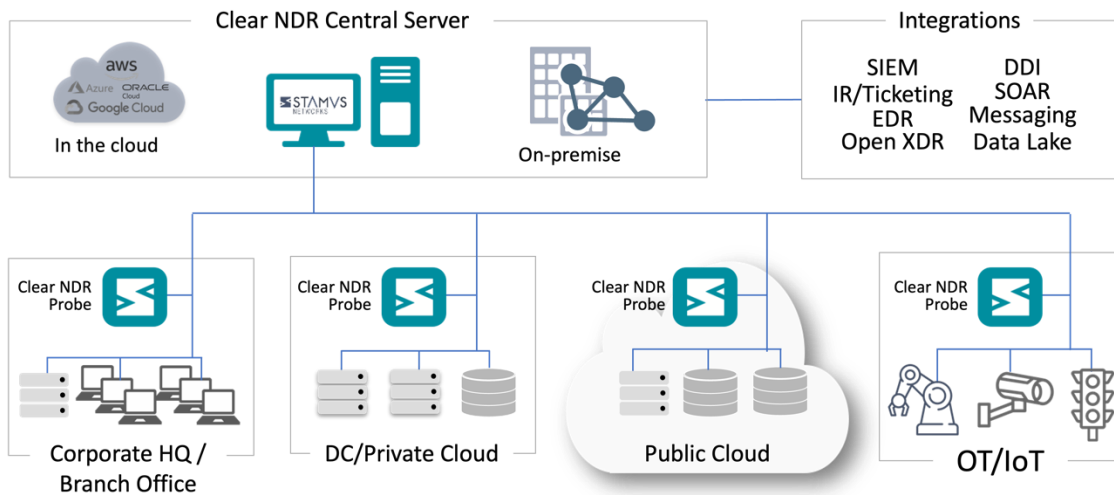

Clear NDR consists of two components: Clear NDR Probe(s) and Clear NDR Central Server, both of which may be deployed in private cloud, public cloud, on-premise, or hybrid environments.

With Clear NDR, security teams can quickly identify critical threats and unauthorized activity with Declarations of Compromise™ and Declarations of Policy Violations™. These high-fidelity events, backed by comprehensive evidence, cut through the noise and drive rapid response.
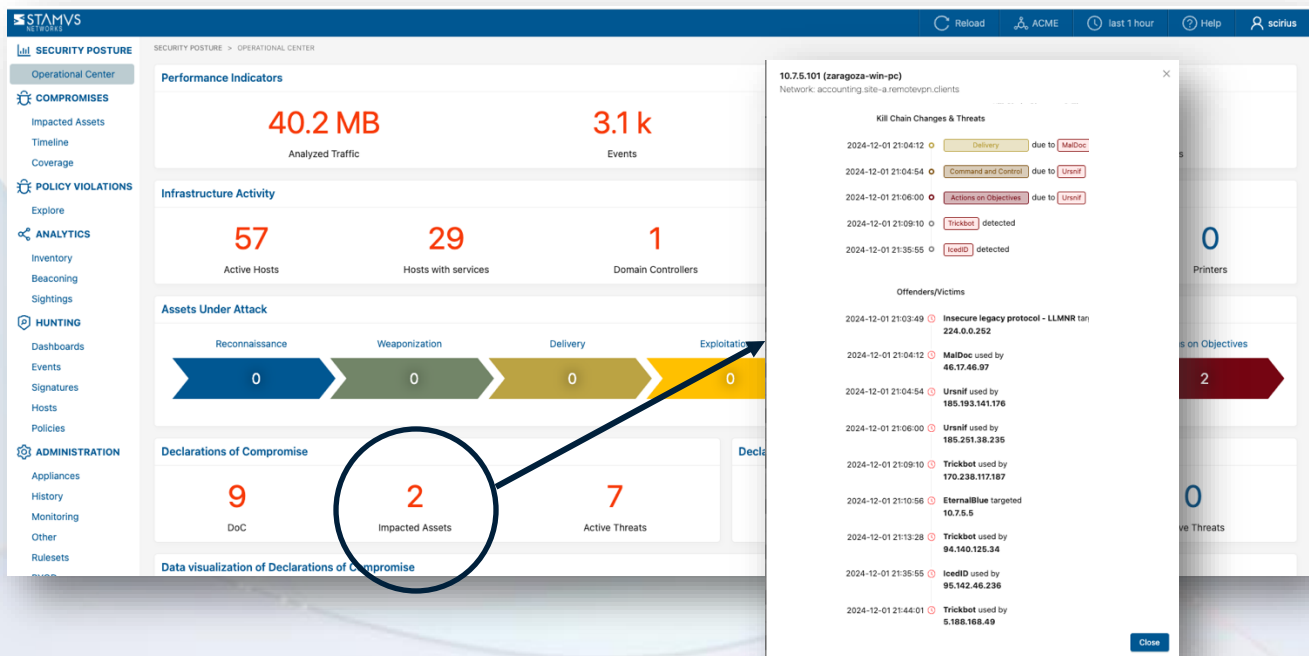

Clear NDR also supports proactive threat hunting with guided workflows and intuitive tools. Analysts can leverage pre-built hunting queries, explore suspicious patterns, and dive deep into historical data to uncover hidden threats that may have evaded traditional detection methods.

Stamus Networks – the global leader in open and transparent enterprise network security

Stamus Networks is revolutionizing network security with Clear NDR, an open and transparent NDR system that empowers defenders to build a truly autonomous SOC. Imagine a SOC that practically runs itself – with AI-powered threat detection and automated response fueled by the richest network telemetry available. Clear NDR helps your team become more efficient than ever, allowing them to focus on strategic initiatives while proactively defending against threats.
